

Freedom Rack Plus

**Freedom and flexibility—
you can adjust these
racks to fit different
equipment sizes.**

FEATURES

- » These four-post adjustable racks combine the economy and accessibility of a rack with the mounting capacity and shape of a cabinet.
- » Change the depth in 1" increments from 17" to more than 41" to fit different equipment.
- » Strong enough to hold heavy servers and equipment—with a maximum load of 2500 pounds.
- » The $\frac{5}{8}$ ", $\frac{5}{8}$ ", $\frac{1}{2}$ " spaced 12-24 tapped-hole or M6 square-hole pattern meets EIA standards.
- » Ships to you unassembled, allowing for easy transport to a job site.
- » Predrilled mounting holes at the base enable you to anchor the rack to the floor for a safe and secure installation.
- » Link multiple racks side-to-side with the joining kit (order separately).
- » Smooth black polyester powder paint finish.
- » UL® 1863 Listed.

RM082A

Four-post, open design eliminates ventilation worries and provides access to all sides of equipment.

Choose from $\frac{5}{8}$ ", $\frac{5}{8}$ ", $\frac{1}{2}$ " spaced 12-24 or M6 holes.

Customizable with a variety of adjustable shelves.

Depth is adjustable in 1" increments from 17.72" to 41.34".

Predrilled mounting holes at the base enable you to anchor the rack to the floor for a safe and secure installation.

OVERVIEW

The **Freedom Rack Plus** combines the ventilation and accessibility of a rack with the mounting capacity and shape of a cabinet. For mounting flexibility, you can adjust its depth in 1" increments from 17" to more than 41" to fit different equipment.

The rack is strong enough to hold heavy servers and equipment—with a maximum load of 2500 pounds, it's strong enough to hold equipment that's too heavy for a standard 2-post rack.

The rack features standard 19" rails with either 12-24 (tapped hole) or M6 (square hole) rails. The uprights and top and bottom angles of the 12-24 models are constructed of lightweight 6063-T6 alloy extruded aluminum, so setup or relocation isn't a back-breaking job. The M6 rack has durable 12-gauge steel uprights.
