CHAPTER 1: INSTALLATION

Plug in the screen and power on.

A keyboard can be plugged into the screen to assist with setup.

For out of the box setups, please follow Steps 1-8 to take you through the on-screen wizard.

Otherwise, go to Step 9.

1.1 SETUP

1. Using the remote, select your preferred menu language and press Next.
2. Select the orientation for on-screen menus and content and press Next. Content orientation can be adjusted from the ICC at any time.
3. Set Auto Power Off to Off as otherwise the screen may unexpectedly turn off.
4. Connect the player to your preferred network. SoC players support both wired and wireless connectivity. Once connected, press Next.
5. Set the date and time and press Next.
6. Play via URL Launcher and when prompted enter the URL of your ICC in the format:

`http://icc*****.domain/soc`

or

`http://<IPaddress>/soc`

NOTE: Make sure you append '/soc' to the end of the URL.

7. Once entered, press Next.
8. Now press OK. You should now be presented with the Samsung Signage menu. If this does not appear, then press the Home button on the remote.
9. To direct the SoC player to a different ICC, select Change URL and input the URL of your ICC following the format specified in Step 6.
10. Once the URL is correct, select URL Launcher.
11. The SoC player will now download the SoC app and you will be presented with an install code page.
12. Enter a configuration install code and press done ("enter" on a keyboard).

The install code can be found by navigating to the Manage Players page of the ICC and selecting the Settings  icon in the left panel. Here you will be able to manage multiple configurations. Each configuration on this page will have its own unique install code.

1.2 DOWNLOADING CONTENT

1. Type in the install code using the Samsung remote or a keyboard.
2. The factory shipped install code is DEFAULT0 (this is the default configuration).
3. Press Enter on the keyboard or OK on the remote.
4. You should see the Player Installation Progress screen.
5. Once the player has installed it will automatically reboot.
6. If the channel has been published the player will download content and switch to playback mode.

NOTE: If the channel has not been published, it will show you the channel ID and wait for it to be published in the ICC.

1.3 CREATING CONFIGURATIONS

1. Click the Manage Players  icon in the top right hand corner of the ICC. You can also reach this page by navigating Home > Manage Players.
2. Click the Settings  icon on the left-hand side.

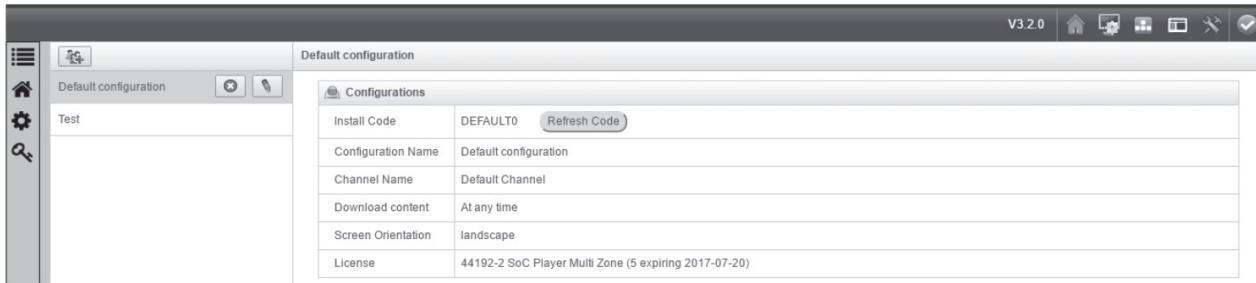

FIGURE 1.

3. Click the Add Configuration  button.
4. Type the name of the configuration and from the drop-down menus select the appropriate channel, screen orientation and license you want your configuration associated with. If you wish to restrict the channel download to specific times then click Restricted Times and enter the appropriate values.

This feature allows you to add and edit configurations. Therefore, you can install screens with pre-set orientations and channels.

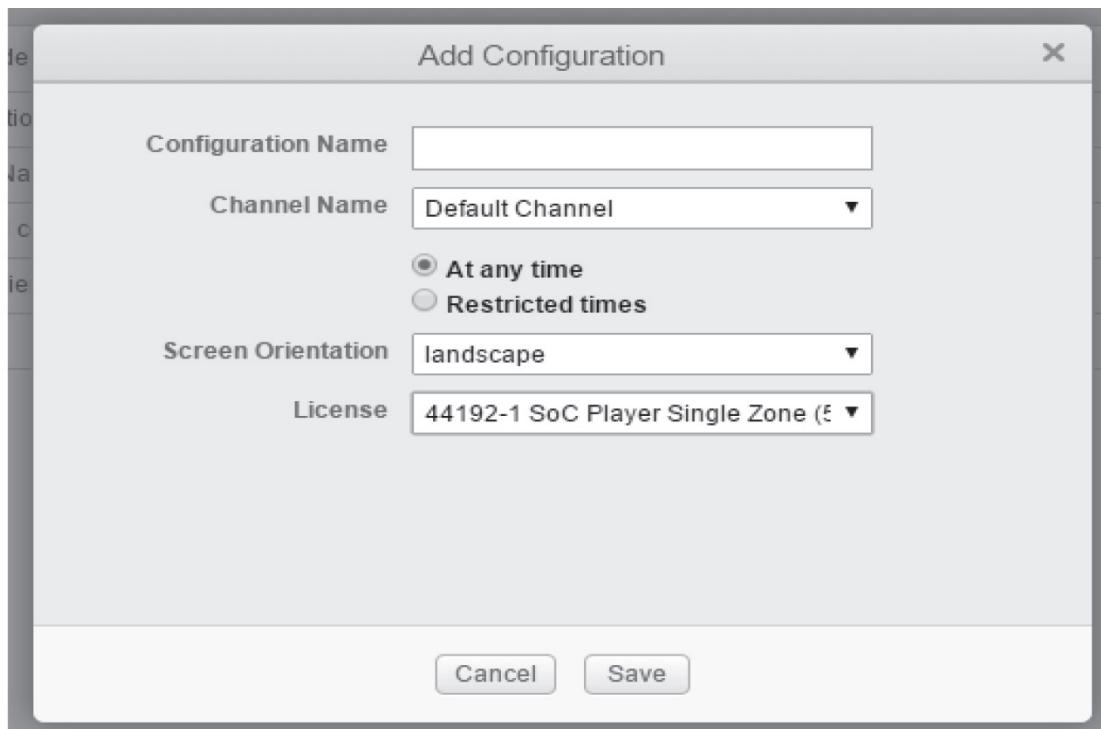

FIGURE 2.

CHAPTER 1: INSTALLATION

1.4 EDITING OR DELETING CONFIGURATIONS

1. Click the Manage Players  icon in the top right hand corner of the ICC. You can also reach this page by navigating Home > Manage Players.
2. Click the Settings  icon on the left-hand side.
3. Hover over a configuration in the list. It will turn blue and two icons will appear to the right.

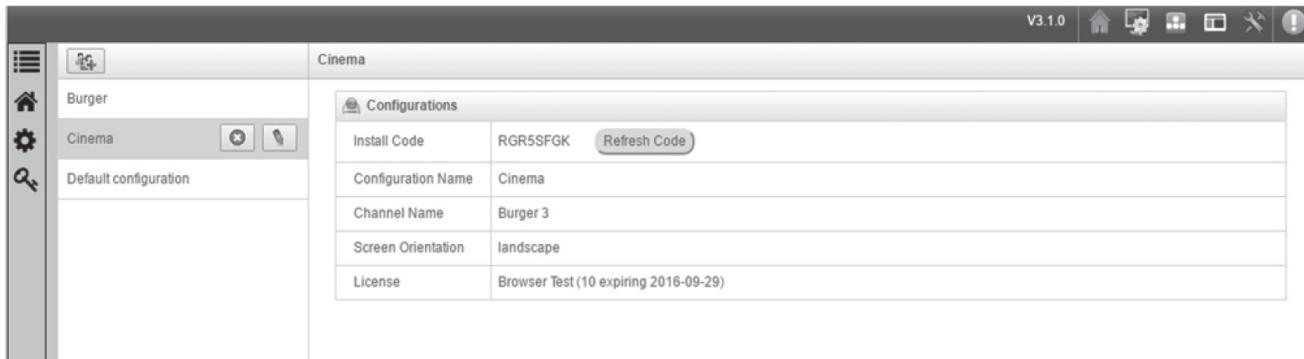

FIGURE 3.

4. To edit:

- 4a. Click the Edit  icon and a pop-up will appear showing you the Installation code.
- 4b. You can rename the configuration, select a different channel or change the screen orientation or associated license.

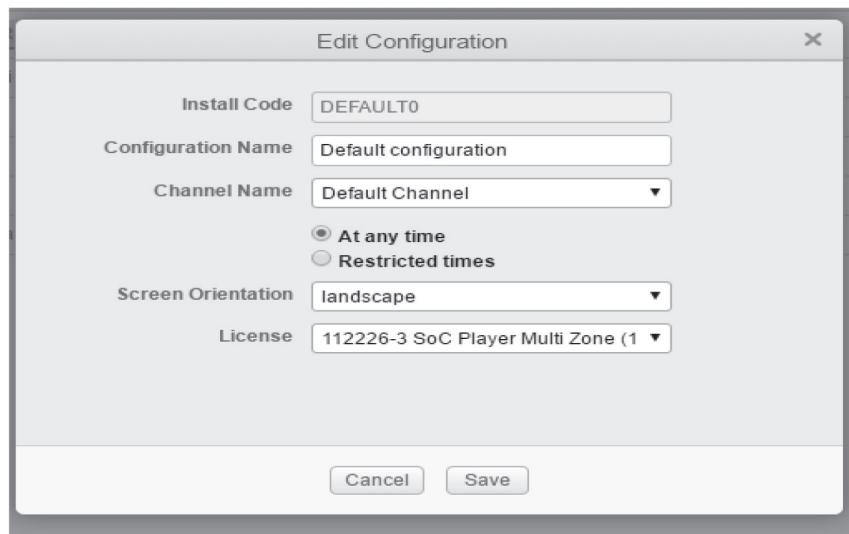

FIGURE 4.

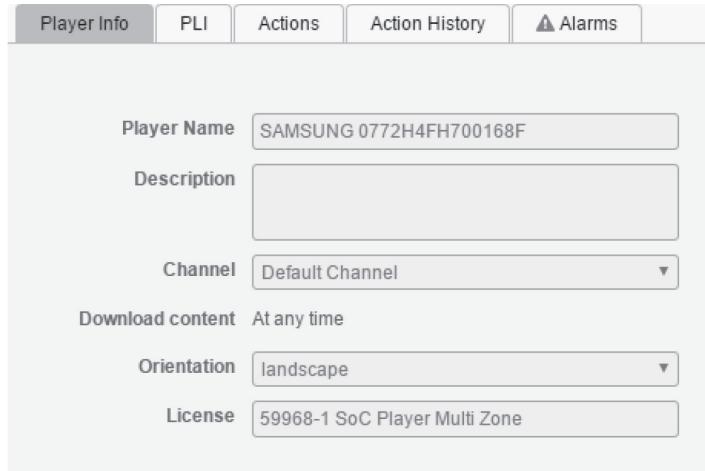

5. To delete:

- 5a. Click the Delete  icon.
- 5b. This will open a pop up asking if you are sure. Select Yes.

CHAPTER 1: INSTALLATION

1.5 INSTALLING CONFIGURATIONS

1. On your ICC, click the Manage Players  icon or navigate Home > Manage Players.
2. Select the player from the list.
3. Click the Actions tab.

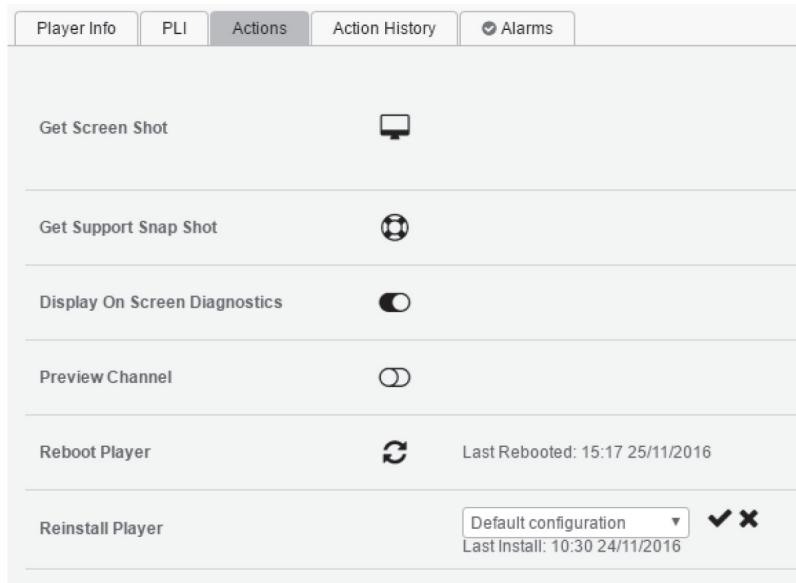

The screenshot shows the 'Actions' tab selected in the top navigation bar. Below it, several configuration fields are displayed:

- Player Name:** SAMSUNG 0772H4FH700168F
- Description:** (empty text area)
- Channel:** Default Channel
- Download content:** At any time
- Orientation:** landscape
- License:** 59968-1 SoC Player Multi Zone

FIGURE 5.

4. Click on the Plug  icon.
 5. Select the preferred configuration from the drop-down menu.
- NOTE: During initial setup, when a SoC player displays the install code page, you can use the reinstall feature on the ICC to install the player. This allows for a remote install rather than typing an install code into each player.
6. Click the tick button and the new configuration will install.

The screenshot shows the 'Actions' tab selected in the top navigation bar. Below it, several options are listed:

- Get Screen Shot 
- Get Support Snap Shot 
- Display On Screen Diagnostics 
- Preview Channel 
- Reboot Player  Last Rebooted: 15:17 25/11/2016
- Reinstall Player  Default configuration  Last Install: 10:30 24/11/2016

FIGURE 6.

CHAPTER 1: INSTALLATION

1.6 TIME ZONE

1. Press the Menu button on the remote.
2. Scroll down to System.
3. Select Time.
4. Click Clock Set.
5. Press Menu to return to the main menu.

2.1 CONFIGURATION BASED

Black Box recommends pre-rotating content before adding it to the ICC. If this is not possible, then orientation can be set through display and configuration.

1. Click the Manage Players  icon in the top right hand corner of the ICC. You can also reach this page by navigating Home > Manage Players.

FIGURE 7.

2. Click the Settings  icon on the left-hand side.
3. Select your configuration from the list.
4. Click on the Edit  button and change the orientation of the screen through the drop-down menu in the pop-up box.

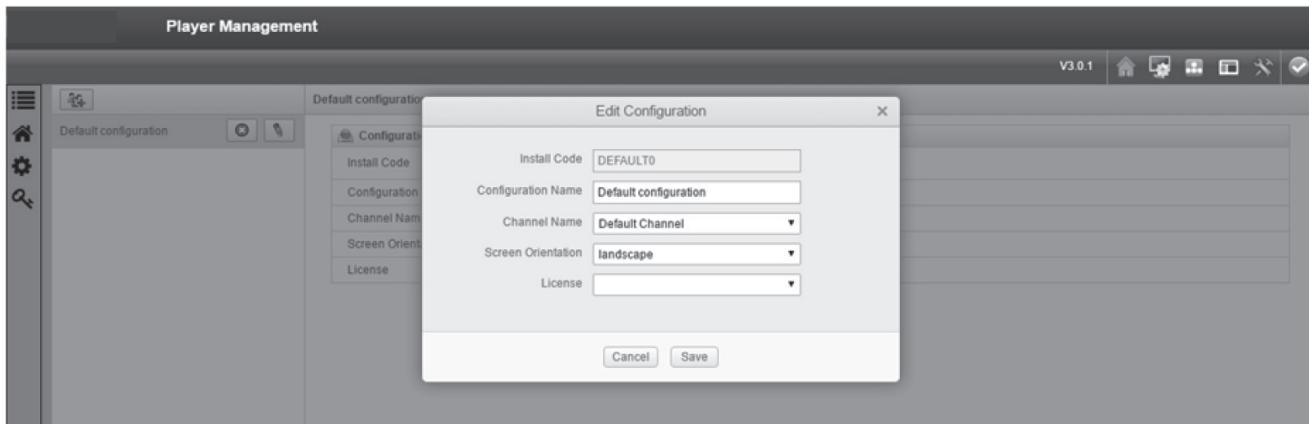

FIGURE 8.

5. Select Save.

NOTE: The display orientation takes precedence over the configuration orientation.

CHAPTER 2: PORTRAIT MODE

2.2 DISPLAY BASED

1. Click the Manage Players  icon in the top right hand corner of the ICC. You can also reach this page by navigating Home > Manage Players.
2. Select your player from the list.
3. Click on the Edit button on the right hand side.

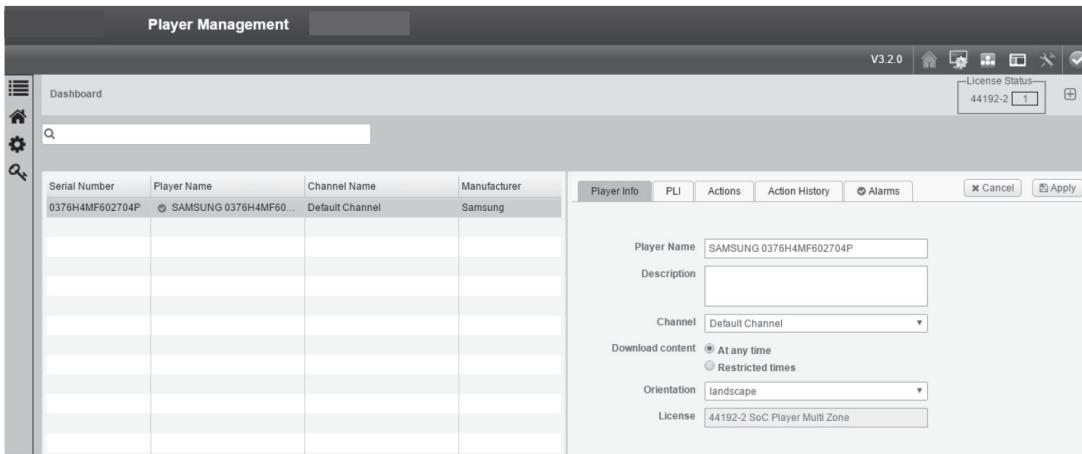

FIGURE 9.

4. The player information will become editable.
5. Select the orientation from the drop-down menu.
6. Click Apply.

NOTE: The display orientation takes precedence over the configuration orientation.

CHAPTER 3: GAPLESS PLAYBACK

3.1 CONFIGURATION

Gapless playback is constrained on Samsung players and content must meet the following specifications to play in gapless mode.

- ◆ The playlist must consist of all videos. Adding any other playlist item will cause it to not run gapless. Therefore, all images must be converted to videos.
- ◆ Each video must play until finished.
- ◆ All videos must have:
 - The same aspect ratio.
 - The same video encoding.
 - The same audio encoding.
 - Mp4 format.

NOTE: Folders with videos are supported subject to these constraints.

CHAPTER 4: FULL SCREEN VIDEO

Full screen video is most easily accomplished by creating a layout with a single full screen video zone. However, you can also use custom position and size following the steps below. This is useful for when your layout is multi-zoned and you want a single item playing full screen and for each other item playing only in that zone.

4.1 CUSTOM POSITION AND SIZE

1. Select the item you wish to go full screen.
2. Click on the item's Edit  button.

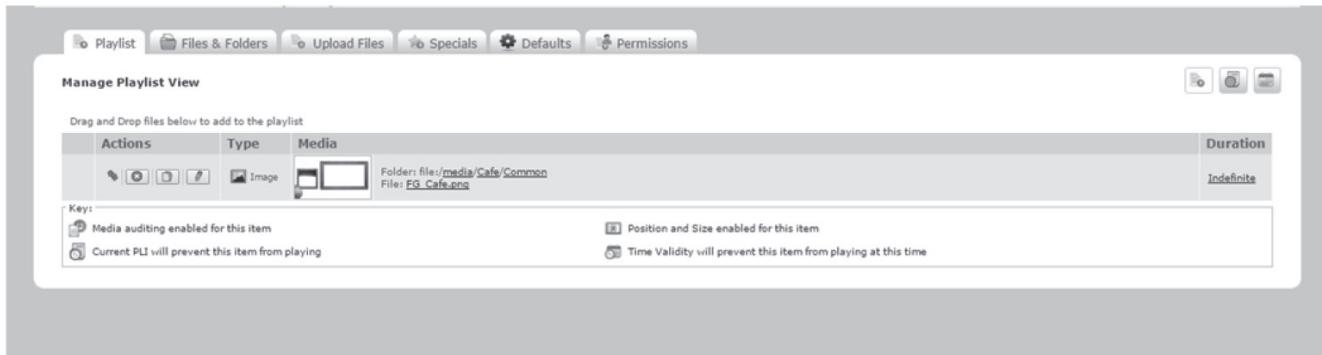

FIGURE 10.

3. Click on the Advanced tab.
4. Select Use custom position and size.
5. Set the left and top margins to 0 pixels.
6. Set the height to 100%.
7. Set the width to 100%.

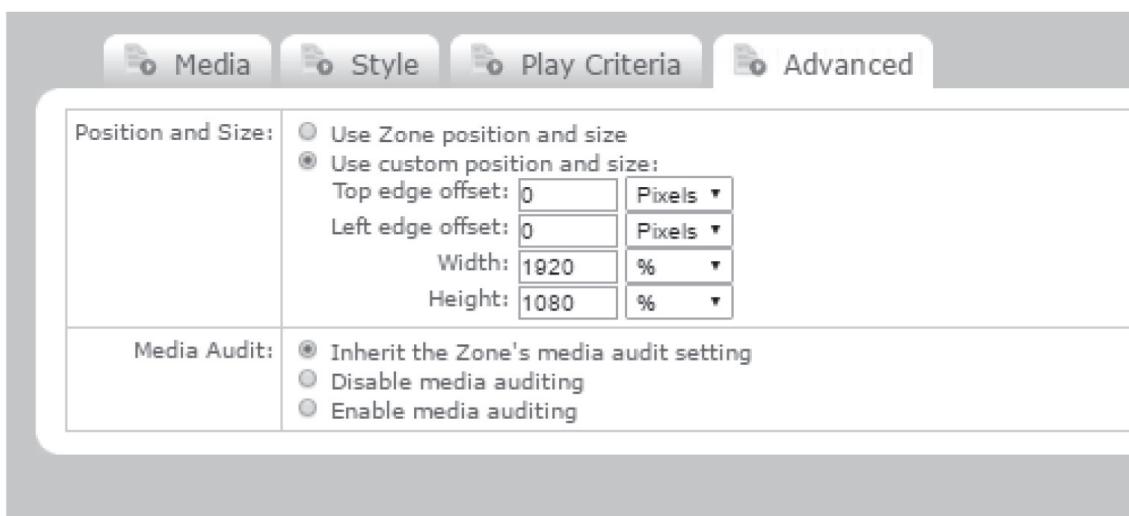

FIGURE 11.

CHAPTER 5: RECOMMENDED SOFTWARE VERSION

1. Press the Menu button on the remote.
2. Scroll down to Support.
3. Navigate to Software Update.
4. The current version will be displayed on the right hand side.
5. Firmware updates can be found at blackbox.com, by calling Technical Support at 877-877-2269, or by emailing info@blackbox.com.

CHAPTER 6: FACTORY RESET

1. Press Home on the remote.
2. Select Change URL and change it to \$DEL.
3. Press Done and launch URL.
4. Now press Home again and change your URL back to your ICC URL.
5. Relaunch player.

CHAPTER 7: SUPPORTED FORMATS

This section lists all the streaming products and media file formats supported on Samsung SSSP2.

7.1 VIDEO AND AUDIO

TABLE 7-1. SUPPORTED VIDEO AND AUDIO FORMATS

FILE EXTENSION	CONTAINER	VIDEO CODEC	RESOLUTION	FRAME RATE (FPS)	BIT RATE (MBPS)	AUDIO CODEC
*.avi *.mkv *.asf *.wmw *.mp4 *.mov *.3gp *.vro *.mpg *.mpeg *.ts *.tp *.trp *.flv *.vob *.svi *.m2ts *.mts *.divx	AVI MKV ASF MP4 3GP MOV FLV VRO VOB PS TS SVAF	Motion JPEG H.264 BP/MP/HP Divx 3.11/4/5/6 MPEG4 SP/ASP Window Media Video v9 (VC1) MVC MPEG2 MPEG1 Microsoft MPEG-4 v1, v2, v3 H 263 Sorrenson Window Media Video v7 (WMV1), v8 (WMV2) VP6	1920 X 1080 1280 X 720	FHD: MAX 30 HD: MAX 60 MAX 30	30	AC3 LPCM ADPCM (IMA, MS) AAC HE-AAC WMA DD+ MPEG (MP3) DTS (Core, LBR) G.711 (ALaw, μ-Law)
*.webm	WEBM	VP8	1920 X 1080	6 –30	20	Vorbis
*rmvb	RMVB	RV8/9/10 (RV30/40)	1920 x 1080	6–30	20	RealAudio 6

CHAPTER 8: KNOWN LIMITATIONS

- ◆ NTB level gapless playback - this is a known limitation with Samsung players. The gapless playback will not be to the same level as the NTB and requires the configuration detailed in this document to be met. If the player cannot play one of the videos then the player will fall back to playing the videos non-gapless.

NOTE: SSSP2 Samsung players cannot support gapless playback in portrait configurations. Gapless playback will only work in landscape.

- ◆ Movies/images - use media of a similar size to the zone as otherwise scaling may cause loss of quality.
- ◆ GIFs - avoid using multiple animated GIFs as these can cause playback issues.

8.1 SAMSUNG LIMITATIONS

- ◆ Some codes may not be playable if there are errors in contents.
- ◆ Media is not able to be played if the file is corrupted or information in the container is wrong.
- ◆ Content that has higher bitrate/frame rate than specifications may have stalling of video or audio during playback.
- ◆ Seek (jump) function is not supported if the index table is corrupted.
- ◆ Network streaming contents may not be played smoothly depending on network status.
- ◆ Some USB/digital camera devices may not be compatible with the player.
- ◆ RMVB is supported only in China, Hong Kong target device.
- ◆ HEVC codec is supported only in MKV/MP4/TS container.

8.1.1 VIDEO DECODER

- ◆ H.264 FHD: supports to level 4.1 (FMO/ASO.RS are not supported).
- ◆ VC1 AP L4 is not supported.
- ◆ Except WMV v7, v8, MSMPEG4 v3, MVC, VP6:
 Below 1280 x 720: 60 frame max.
 Above 1280 x 720: 30 frame max.
- ◆ GMC 2 or higher are not supported.
- ◆ SVAF top/bottom, side by side, left/right view sequence type (2 ES) are supported.
- ◆ Only BD MVC Spec is supported.

8.1.2 AUDIO DECODER

- ◆ WMA: supports to 10 Pro 5.1 channel.
- ◆ WMA lossless audio: not supported. Supported to M2 profile.
- ◆ China, Hong Kong target device doesn't support RealAudio 10 lossless.
- ◆ QCELP, AMR, NB/WB are not supported.
- ◆ Vorbis: supports to 5.1 ch.
- ◆ DD+: supported to 5.1 ch.
- ◆ DTS LBR codec is supported only in MKV/MP4/TS container.

CHAPTER 9: ZONE LIMITS FOR BEST PERFORMANCE

TABLE 9-1. ZONE LIMITS FOR BEST PERFORMANCE

CONTENT	LIMIT
Movies*	1
HTML	1
HTML Clock	1
Scrolling Text	2
Static Text	Unlimited
Images	Unlimited

* Including HDMI input
